## Section III – Hazard Identification

<b>Potential Acute Health Effects:</b>				
<b>Eyes and Skin:</b>	Contact may cause eye irritation and prolonged contact with skin may cause some irritation.			
<b>Inhalation:</b>	High dust concentrations of air-borne material may cause irritation of the nose and upper respiratory tract with symptoms such as sore throat and coughing. Inhalation of decomposition gases can cause irritation and corrosive effects on the respiratory system. Some lung effects may be delayed.			
<b>Ingestion:</b>	Ingestion of small quantities are unlikely to cause toxic effect. Large quantities may give rise to gastro-intestinal disorders.			
<b>Potential Chronic Health Effects:</b>	No adverse effects are known.			
<b>CARCINOGENICITY LISTS</b>	<table border="1"> <tr> <td><b>IARC Monograph:</b> No</td> <td><b>NTP:</b> No</td> <td><b>OSHA:</b> No</td> </tr> </table>	<b>IARC Monograph:</b> No	<b>NTP:</b> No	<b>OSHA:</b> No
<b>IARC Monograph:</b> No	<b>NTP:</b> No	<b>OSHA:</b> No		

<b>Section IV – First Aid Measures</b>	
<b>Eyes:</b>	Immediately flush eyes (holding eyelids apart) with plenty of water for at least 15 minutes. Get medical attention if irritation develops or persists.
<b>Skin:</b>	Wash skin thoroughly with soap and water.
<b>Ingestion:</b>	Do not induce vomiting. Drink large amounts of water (or milk if available) to dilute stomach contents. Small quantities are unlikely to cause toxic effect. Get medical attention if a large amount of DAP is ingested (small children, more than 50g).
<b>Inhalation:</b>	Remove from source of exposure to dusts. Obtain medical attention if the effects occur. Persons who have inhaled decomposition gases (e.g. in a fire) should obtain immediate medical attention.

<b>Section V – Fire Fighting Measures</b>			
<b>Flash Point:</b>	Non-flammable	<b>Autoignition Temperature:</b>	Not Applicable
<b>Lower Explosive Limit:</b>	Not Applicable	<b>Upper Explosive Limit:</b>	Not Applicable
<b>Unusual Fire and Explosion Hazards:</b>	DAP is a non-flammable inorganic salt and is not flammable however when strongly heated, DAP will decompose giving off ammonia.		
<b>Extinguishing Media:</b>	Chemical type foam, CO <sub>2</sub> (Carbon Dioxide), dry chemical, water fog.		
<b>Special Firefighting Procedures and Equipment:</b>	Keep personnel removed from and upwind of fire. Wear full fire-fighting turn-out gear (full Bunker gear) and respiratory protection (SCBA).		

<b>Section VI – Accidental Release Measures</b>	
<b>Small Spill:</b>	Spillage should be swept up and placed in chemical waste container to be disposed at an appropriate waste disposal facility according to current applicable laws and regulations and product characteristics at time of disposal. Adequate ventilation is required.
<b>Large Spill:</b>	Contain spill and transfer the material to appropriate containers for reclamation or disposal. Dispose of material at an appropriate waste disposal facility according to current applicable laws and regulations and product characteristics at time of disposal. Adequate ventilation is required.
<b>Release Notes:</b>	If spill could potentially enter any waterway, including intermittent dry creeks, contact the local authorities. If in the U.S., contact the US COAST GUARD NATIONAL RESPONSE CENTER toll free number 800-424-8802. In case of accident or road spill notify: CHEMTREC IN USA at 800-424-9300; CANUTEC in Canada at 613-996-6666 CHEMTREC in other countries at (International code)+1-703-527-3887.
<b>Comments:</b>	See Section XIII for disposal information and Section XV for regulatory requirements. Large and small spills may have a broad definition depending on the user's handling system. Therefore, the spill category must be defined at the point of release by technically qualified personnel.

<b>Section VII – Handling and Storage</b>	
<b>Ventilation:</b>	Use with adequate ventilation.
<b>Handling:</b>	Use appropriate personal protective equipment as specified in Section VIII. Avoid excessive generation of dust and avoid unnecessary exposure to the atmosphere to prevent moisture pick-up.
<b>Storage:</b>	Store in dry, well ventilated area, away from potential sources of heat and fire.

<b>Section VIII – Exposure Controls/ Personal Protection</b>	
<b>Engineering Controls:</b>	Avoid high dust concentration and provide ventilation where necessary.
<b>Personal Protection:</b>	
<b>Eye Protection:</b>	Wear tight fitting goggles in dusty areas to reduce dust exposure to the eyes.
<b>Protective Clothing:</b>	Wear suitable gloves when handling this product over long periods. If skin irritation occurs, wear long sleeves.
<b>Respiratory Protection:</b>	Wear NIOSH approved respiratory protective equipment when exposure exceeds the OSHA nuisance dust standard of 15 mg/m <sup>3</sup> or the ACGIH nuisance dust limit of 10 mg/m <sup>3</sup> for the eight hour time weighted average. When stored in closed area, a self-contained breathing apparatus is required to protect against ammonia gas.
<b>Other Protective Clothing or Equipment:</b>	Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower.
